News From the Principal

The students have all been engaged in meaningful and educational programs this term. In the science unit of work we are looking at the senses and in HSIE, the students are exploring their environment, both locally and Australian landforms.

We are continuing our drumming and percussion program this term and the students are really becoming excellent at maintaining the rhythm and beat. In our fundamental movement skills program we are mastering the throwing and catching skills we learnt in term 2 and learning to do a static balance.

We are learning about healthy choices and our crunch and sip program continues this term. See below another interesting fact about water.

We were lucky to have Mr Bugeja join us on Thursday afternoon to begin a woodwork project with the students. He had cut all the timber ready for us to begin to build a rabbit hutch. The students were all fully engaged and interested in assisting the building of this hutch. We will continue with this project this week. Thank you Mr Bugeja for your time.

Kerry Flick
Relieving Principal

Water
- About two thirds of our body is water
- It carries food around our body
- It carries away waste
- It keeps our temperature steady
Drink plenty of clean, plain water: it is THE thirst quencher!
