The term is really flying past, we are already into week 7 and the students have all been keeping busy with a vast range of activities.

Last Friday the students all designed and made their own kite and then later in the day went out to fly them in the playground. Everyone had great success managing to get their kite in the air for a period of time.

On Friday the students worked on the fundamental movement skills of striking and throwing and later in the day put it all into practice with a game of T-ball. They weeded and watered the garden and picked some lovely juicy strawberries to eat. Everything is growing well and we are looking forward to the cherry tomatoes ripening any day now.

Last Thursday Mrs Brown and Gage went on a special excursion to Windara. Gage decorated a cup cake and potted a strawberry plant. He also had the opportunity to meet and socialise with other children from our community of small schools. Both Mrs Brown and Gage returned with smiles and plenty of stories.

Mrs Brown’s guest speaker also visited on Thursday and spoke about the toys which were used 60 years ago and how they have changed.

Thank you Mr Bugeja for giving up your time and sharing your childhood stories with the children. I know they enjoyed hearing your stories and are looking forward to building a scooter with you in the future.
